

Leader Ring Type Joint R Octagonal

Ring Type Joint Gaskets

DESCRIPTION

Leader ring type joint flange gaskets (RTJ gaskets) are used in applications that involve extreme pressures and high temperatures. All Leader ring type joint gaskets are manufactured in compliance with API-6A and ASME B16.20.

APPLICATION

Ring Joint gaskets are widely used between pipeline flanges, valves and pressure vessels in the Oil & Gas industry; Withstand high pressure situations up to 400 bar (pending on flange construction and rating); Style R gaskets are suitable for ASME B16.5 flanges up to 2500 lbs. API 6A type 6B flanges can withstand a pressure up to 5000 psi.

CHEMICAL COMPATIBILITY

Corrosion and chemical resistance depend on the selected RTJ gasket material. The pressure and temperature ranges can be found in the Technical Specifications, see table 1.

DELIVERY OPTIONS

Octagonal shaped RTJ gaskets are available in ring numbers R11 up to R105. Leader can produce custom made gaskets according to customer specifications. Common stock materials Soft Iron and SS316(L). Other materials are also available, please to table.

TEMPERATURE

Corrosion and chemical resistance depend on the selected RTJ gasket material. The pressure and temperature ranges can be found in the

Technical Specifications, see table 1.

APPROVALS & CERTIFICATES

- ASME B16.20
- API 6A (ISO 10423)
- EN10.204 3.1

SEALING CHARACTERISTICS

- Interchangeable with a corresponding type R Octagonal Style and type RX number
- Non blow-out type

TECHNICAL DATA

max Temperature [°C]	See material table below
min Temperature [°C]	See material table below
max Pressure [bar]	400
M-value Soft Iron (D) and Soft Steel (S)	5.5
M-value Stainless steel	6.5
M-value Monel and F5	6
Y-value Soft Iron (D) and Soft Steel (S) [psi]	18000
Y-value Stainless Steel [psi]	26000
Y-value Monel and F5 [psi]	21800
Gasket required flange roughness [Ra micron]	1,6 max.
Gasket required flange roughness [RMS]	63 max.
